Updating Java

1.) Click **Start** in lower left corner

2.) Type **Configure Java** (in the Search for programs and files box)

3.) Wait for it to appear and click on it

4.) Click on the **Advanced** tab

5.) Scroll to the bottom and make sure **Suppress sponsor offers when installing or updating Java** is checked

    a.) If not checked, click in the box and then Click **Apply**

    b.) Click **Yes** to accept changes to be made in the program

6.) Click on the **Update** tab

7.) Click **Update Now**

8.) A shield may start flashing at the bottom or you will be prompted "Do you want to make changes to this program" Click **Yes**

9.) Then you will see that you are one of the 3 Billion that use Java as it is installing.

10.) Then you will see "You have successfully installed Java" Click **Close**

11.) Google Chrome will open.

12.) Please note: It is normal to see this message "The Chrome browser does not support NPAPI plug-ins and therefore will not run all Java content. Switch to a different browser to run the Java plug-in. That does NOT mean that Google Chrome will not run Blackboard collaborate because it will. NPAPI stands for Netscape Plugin Application Programming interface. Bbc does not use this interface.
